

# Doctoral Dissertations from Organization, Management and Entrepreneurship at South East European Universities (1997-2016)

Doktorske disertacije iz područja menadžmenta, organizacije i poduzetništva u regiji (1997-2016)

Prof. dr. sc. Darko Tipurić

7. Interkatedarski skup katedri za organizaciju, menadžment i poduzetništvo na visokoškolskim institucijama u jugoistočnoj Europi

Management Education and Research in the Upcoming Epoch: Rethinking Discipline and Reconceptualization Modes of Creating Knowledge

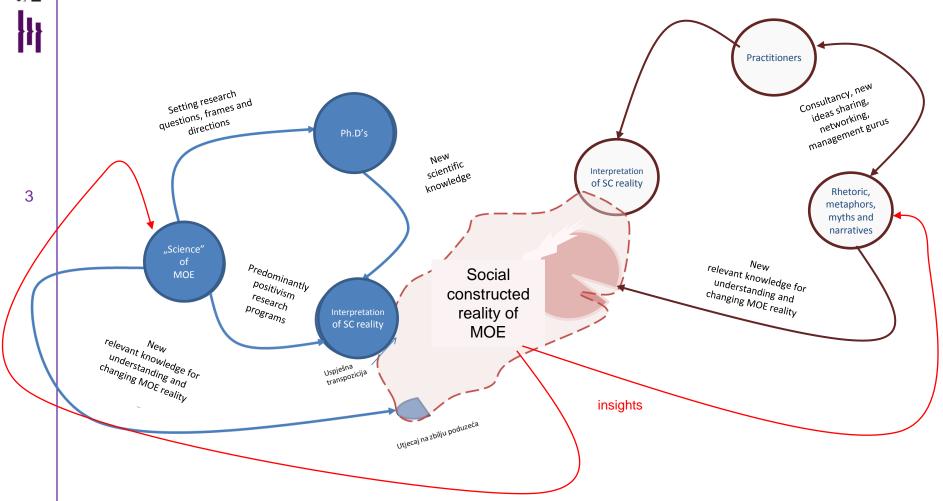

#### Introduction

- The paper explores basic features of doctoral dissertations in the field of organization, management and entrepreneurship, which were defended in the period of 1997-2016 at 13 universities from four Southeast European countries (Croatia, Slovenia, Bosnia and Herzegovina, and Serbia).
- Our intention is to explore several issues: (1) to identify the most important themes depicted in the doctoral dissertations in South East Europe in the areas of management, organization and entrepreneurship, (2) to determine whether there are significant divergences in the research practice of the universities in the region, and (3) to explore how the research interest in doctoral topics in these areas moved over time at selected universities.

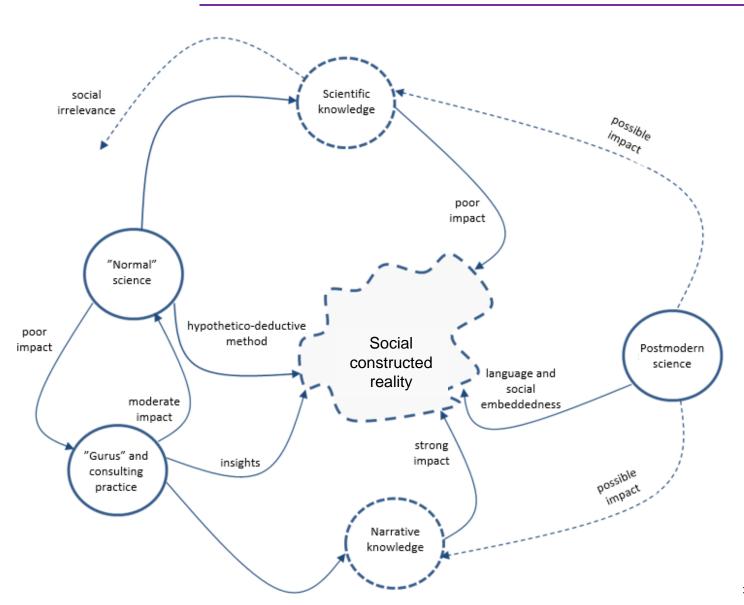

# Problem of irrelevance of scientific knowledge in MOE studies

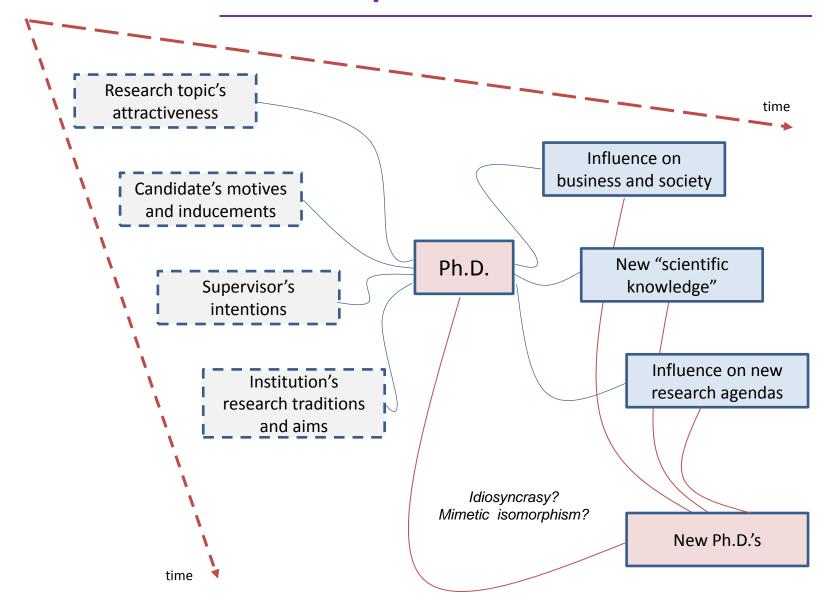

## Is normal science a significant component in creation of knowledge in MOE?

## The phenomenon of dissertations' correspondences and similarities

#### **Selected institutions**

- Sveučilište u Zagrebu, Ekonomski fakultet -Zagreb University of Zagreb, Faculty of Economics & Business (EFZG)
- Sveučilište J. J. Strossmayera u Osijeku, Ekonomski fakultet
   J. J. Strossmayer University of Osijek, Faculty of Economics (EFOS)
- 3. Sveučilište u Rijeci, Ekonomski fakultet University of Rijeka, Faculty of Economics (EFRI)
- 4. Sveučilište Jurja Dobrile u Puli, Fakultet ekonomije i turizma "Dr. Mijo Mirković" Juraj Dobrila University of Pula, Faculty of Economics and Tourism "Dr. Mijo Mirković" (EFPU)
- 5. Sveučilište u Splitu, Ekonomski fakultet University of Split, Faculty of Economics (EFST)
- 6. Univerzitet u Kragujevcu, Ekonomski fakultet University of Kragujevac, Faculty of Economics (EFK)
- 7. Univerzitet u Novom Sadu, Ekonomski fakultet u Subotici University of Novi Sad, Faculty of Economics Subotica (EFSU)

- Univerzitet u Sarajevu, Ekonomski fakultet University of Sarajevo, School of Economics and Business (EFSA)
- 9. Univerzitet u Banjoj Luci, Ekonomski fakultet University of Banja Luka, Faculty of Economics (EFBL)
- 10. Sveučilište u Mostaru, Ekonomski fakultet University of Mostar, Faculty of Economics (EFMO)

#### Basic information about selection of dissertations

- 396 doctoral dissertations were defended in thirteen institutions in Southeast Europe from 1997 to 2016 in the area of management, organization and entrepreneurship. Since we conducted the survey in mid 2017, we have also received data on 6 newly defended dissertations, so we also included them in the analysis of themes and keywords.
- The analysis by years shows an evident increase in the number of doctoral dissertations over the observed period. By 2003, there were less than ten PhDs per year in the analyzed institutions, and since then the number of dissertations has been increasing gradually from year to year and in 2016 it has reached the number of 52 defended dissertations.

# Number of MOE doctoral dissertations – selected institutions (1997-2016)

#### Mapping intellectual structure of dissertations

- **253** different themes were identified, including three that have the highest frequency of occurrence: **performance** (89), **strategy** (66) and **management** (51).
- Of that number, **145** themes are listed only once and **26** twice. The total number of occurrences of themes in the selected dissertations is **1106**.
- Based on the analysis of key themes we sought after to determine whether there are significant divergences in the research practice of the universities in these research areas.
- Besides, we carried out a multiple correspondence analysis
   (MCA) and correspondence analysis (CA) which provided us with
   a two-dimensional models illustrating the themes' and
   institutions based on their proximity.

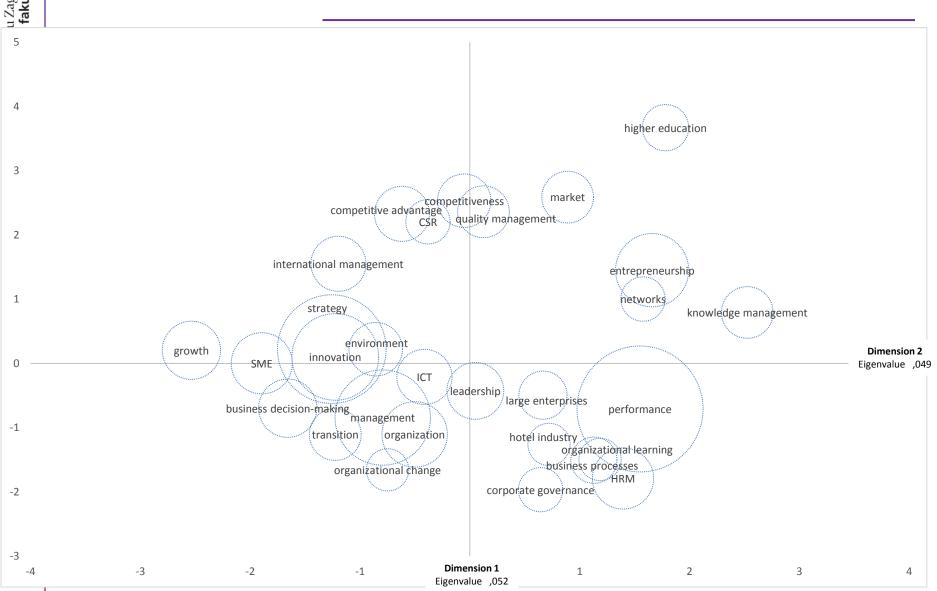

### Mapping intellectual structure of dissertations: Multiple correspondence analysis

- Multiple Correspondence Analysis (MCA) is an exploratory data analysis technique for the graphical display of multivariate categorical data. Two-dimensional space, illustrating themes' importance and their proximity, as result of MCA and content analysis, is suitable graphical presentation of data and solid basis for considering the analyzed phenomena.
- The position of themes on the map symbolizes the content of all dissertations that might be described by the two dimensions that emerged from the analysis.
- The distance between the circles reflects the proportion of dissertations that jointly discuss the topics related to the themes: the closer they are in their proximity, the larger the segment of dissertations that mention them together and vice versa.

u Zagrebu **fakultet** 

### The intellectual structure of the dissertations in management, organization and entrepreneurship in SEE Universities

## Correspondence analysis of dissertations' themes and institutions

- Correspondence analysis is a statistical visualization method for of exploring the relationship and picturing the associations between the levels of a two-way contingency table
- It is a geometric technique for displaying the rows and columns of a two-way contingency table as **points** in a low-dimensional space, such that the positions of the row and column points are consistent with their associations in the table
- For purpose of our study, we have selected two variables for CA: (1) the institutions and (2) the themes

### **Correspondence analysis of** dissertations' themes and institutions

two-way contingency table (13 institutions \* 29 themes)

## Correspondence analysis of dissertations' themes and institutions

- Two variables can be represented as two set of points on symmetric map (the graphical representation of results from CA) in subsequent analysis
- Row points (column points) that are closer together have more similar column profiles (row profiles).
- The positions of two sets of points with respect to each other are **not** directly comparable which means the distance between row and column points cannot be interpreted directly and should be explained with caution.

#### dissertations' themes and institutions: symmetrical map

### **Concluding remarks**

- There is a significant increase in the number of PhDs in all analyzed institutions in the past 20 years.
- There is no doubt about the existence of different interests and a variety of doctoral topics. However, there is a strong concentration of research efforts to investigate the relations between some of the management, organizational or entrepreneurial constructs and firm and/or managerial performance
- There are significant differences and some similarities based on themes frequency in dissertations of the analyzed universities. CA and MCA show interesting parallels and divergences among SEE institutions regarding Ph.Ds in this research area.
- In addition, we have noticed a rise in the number of dissertations focused on innovation and leadership in the past years. This shows particular shift in research interest in organization, management and entrepreneurship areas in South East Europe
